

The Precursors of Celtic and Germanic

ADAM HYLLESTED

University of Copenhagen

1. Loanword or heritage?

While Germanic has quite a few Celtic loanwords (see, e.g., de Vries 1960, Birkhan 1970, Mees 1998, Rübkeil 2002, Schumacher 2007, Stifter forthcoming), the share of older Germanic material in Celtic is comparatively small (Lane 1933:264, and Schumacher 2007:174–6). However, Celtic and Germanic also share lexical material exclusive to these branches that can be independently traced back to an identical reconstructed protoform. Therefore, it is often hard to determine whether a given Celto-Germanicism is inherited from PIE or borrowed from one branch to the other at a later age. Karsten (1927:126) wrote on PGmc. **arhja-* vs. PCelt. **orbios* ‘heir’ and PGmc. **aiþa-* vs. PCelt. **oito-* ‘oath’: “... kan likaså vara antingen urbesläktat med eller lån [might just as well be inherited as borrowed]” Krahe used the same lexeme as an example (1954:142): “Die Hauptmasse des gemeinsamen nur keltisch-germanischen Wortschatzes reicht—ohne daß vom rein linguistischen Standpunkt Anhaltspunkte für eine Entlehnung aus der einen in die andere Sprache gegeben werden könnten—bis vor die Periode der Lautverschiebung zurück (Typus got. *aiþs*—air. *ōeth* usw).” Olsen (1988:13) writes on PGmc. **gīslo-* ‘hostage’ vs. PCelt. **geistlo-* ‘id.’: “It is not certain whether the Gmc. examples are inherited or Celtic loanwords.” Casaretto (2004:318n1051) on PGmc. **rū-nō-* ‘secret’ vs. PCelt. **rū-nā-* ‘id.’: “Ob diese Parallellität Lehnbeziehungen oder ein gemeinsames Erbe reflektiert, ist unsicher.” Ringe (2006:296) states: “There are also quite a few words shared only by Celtic and Germanic, which might or might not be loanwords” Matasović (2009:227) on Proto-Celtic **krumbo-* ‘round, curved’: “Germ. *krumm*, OE *crumb* ‘round’ point to PGerm. **krumba-*, which was borrowed either from Celtic, or from the same non-IE source as the Celtic words.” Polomé (1983:284) summed up the problem complex, listing four possible origins of a Celto-Germanicism: “(a) the terms represented either a common regional innovation in a marginal area of the Indo-European territory or the localized survival of an archaic term lost elsewhere throughout the Indo-European Linguistic area; (b) the terms have both been taken over from a same third source—be it a Pre-Indo-European (‘substrate’) language or less well-documented Indo-European language in their

vicinity; (c) the Celtic term was borrowed by Germanic; (d) the Germanic term was borrowed by Celtic.” Lane (1933) and Elston (1934) excluded borrowing, i.e., possibilities (c) and (d), whenever it could not be proved directly.¹ In the following, I will use the term “Celts-Germanicism” for items believed to be older than the emergence of Proto-Celtic and Proto-Germanic, but shared by these two branches only, i.e., Polomé’s categories (a) and (b).

2. Semantic spheres

Scholars already noted long ago that such Celts-Germanicisms pertain to certain semantic spheres. Thus, Lane (1933) suggested the following headings:

- (a) Political and legal vocabulary
- (b) Warfare
- (c) Cultural and technical vocabulary, dwelling
- (d) Nature, earth, land, plant and animal life
- (e) Motion, locomotion, transportation
- (f) The body and bodily functions
- (g) Mental and emotional activity, vocal utterance
- (h) Sense perception
- (i) Family
- (j) Religion, superstition
- (k) Miscellaneous

and Krahe (1954:139–41):

- (a) Religion und geistiges Leben
- (b) Pferdezucht und Reiten
- (c) Siedlung, Hausbau
- (d) Landschaft, Natur
- (e) Metalle
- (f) Sonstiges

Elston (1934) and Campanile (1970) had still other divisions. On one hand, it is interesting to observe how an overrepresentation of shared vocabulary in certain semantic fields hints at the character of the relationship in question. On the other hand, it seems as if Lane’s and Krahe’s lists cover most parts of the lexicon. If the lexical commonalities could be combined with shared innovations and archa-

¹ Schmidt (1984, 1986, 1987, 1991) proposed a five-strata model: *stratum 1*, whose Celtic origin is proved by their form; *stratum 2*, Celts-Germanic isoglosses with the same semantic shift; *stratum 3*, Celts-Germanic isoglosses without the same semantic shift; *stratum 4*, a group with special problems in the semantic field of craftsmanship; and *stratum 5*, name-doubles.

isms in the phonological or grammatical system, it would be the obvious thing to hypothesize that Celtic and Germanic formed a subgroup within the Indo-European family. This seems not to be the case.² A closer scrutiny of the material indeed reveals a much less blurred and much more unambiguous picture of the character of the earliest Celtic-Germanic relations.

3. The material

Lists of Celto-Germanicisms have been compiled by Lane (1933), Elston (1934), Krahe (1954), de Vries (1960), Chemodanov (1962), Campanile (1970), and Polomé (1983). What follows is a revised and updated synthesis of their material with the addition of new items. The items have been divided into eight categories according to meaning (see §4 below). Within these categories, they have furthermore been grouped into (A) lexemes with a specialized meaning or use shared by Celtic and Germanic, (B) formations particular to Celtic and Germanic (although formed from well-known PIE elements), and (C) lexemes whose very roots or root variants are unknown outside Celtic and Germanic:³

Category I

A. Unique meaning

- (1) PCelt. **soito-* ‘sorcery’ > MW *hut*, Bret. *hud* ‘magic’ ~ PGmc. **saiða-* > ON *seiðr* ‘magic; spell, charm, enchantment’, *siða* ‘work a charm through *seiðr*’. Probably identical to PIE **soj-to-* ‘string, rope’, derived from **seh₂j-* ‘to bind’;⁴ cf. Lith. *saitas* ‘sign, soothsaying, soothsayer, talisman’, but in Baltic also still ‘string, necklace, etc.’; cf. Lith. *siėtas*, Latv. *saite* ‘id.’

2 The features mentioned by Schmidt (1991:146–7) are either too weak or too common to count as obviously shared innovations.

3 Space does not allow a word-by-word treatment of items that I have refused to include as true Celto-Germanicisms. A few examples may serve as prototypes: Craig Melchert (p.c.) kindly points out to me that **tegu-* ‘thick’ in OIr *tiug*, W *tew* ~ OE *þicce*, OHG *dicki*, ON *þykk* ‘thick’ is probably also attested in Hittite *tagu-* ‘thick, swollen’ < **togu-* (Neu 1995); **luH-s* ‘louse’ > W *llau* ‘lice’ (< collective **luqā* < **luH-eh₂*), Corn. *low*, Bret. *laou* ‘id.’, OW *leu-esicc* ‘louse-eaten’ ~ ON *lús*, OE, OHG *lūs* ‘louse’ vs. Toch. B *luwo*, A *lu*, pl. *lwā* ‘animal’ probably also forms the basis of Lith. *liūlė* ‘louse’ (where *-lė* is diminutive, cf. *brolė* ‘brother’); PCelt. **korkio-* ‘oats’ (believed by Matasović 2009 to be of a common substratal origin) corresponds to Shughni *sip(i)yak* ‘a kind of millet’, *sepyak* ‘grain of wheat’ according to Stalmaszczyk and Witczak (1991–92). Rasmussen (1998) regards PGmc. **landa-* ‘(open) land’ as a borrowing from Celtic proper.

4 See Rasmussen 1989:59–60.

- (2) PCelt. **oitos* ‘oath’ > OIr. *óeth*, MW *an-udon* ‘perjury’ ~ PGmc. **aiþaz* ‘oath’ > OE *āþ*, OHG *eid*, ON *eiðr*, Goth. *aiþs* ‘oath’, OS *mēn-ēþ* ‘perjury’; vs. Gk. *oĩtos* ‘faith’, all from PIE **h₁óǵ-to-s* ‘walk(ing)’, derived from **h₁ej-* ‘to go’, cf. ON *ganga eið* ‘take the oath’ (see also Schumacher 2007:176–7).⁵
- (3) PIE **kor-ǵo-no-* in the epithet of a god: OBrit. tribal name *Coriono-tōtae* ‘people of the army-lord (a god, probably Lugus)’ ~ PGmc. **harjanaz* > ON *Herjann* ‘lord of the army’, epithet of Odin; vs. Gk. *κοίρανος* ‘ruler, commander’ < **koĩponos* (Meid 1991:48–9).
- (4) A personalized form meaning ‘ghost’ of PIE **d^hrouǵh^{ós}*: OIr. *air-drech* ‘phantom’, Mlr. *aur-fraich* ‘ghost’ ~ ON *draugr* ‘ghost’ vs. Ved. *drógha-* ‘deceiving’, Av. *draoga-* ‘lie’ (Mallory and Adams).⁶

B. Unique morphology

- (5) PCelt. **rūna-* > OIr. *rún* ‘secret’, MW *rhin* ‘spell, enchantment’ ~ PGmc. **rū-nō-* ‘secret’ > OE *rún*, OS *rūna* ‘whisper; secret; a rune’, ON *rún* ‘rune; secret’.⁷
- (6) Gaul. (Chamalières) *ande-díon uēdiu-mi* ‘I praise a god’ ~ Goth. *in-weitan gup* ‘to praise God’ < **ueǵd-* ‘see’ where *ande-* semantically corresponds to *in-* (de Bernardo Stempel 2001).⁸
- (7) PCelt. **nem-eto-* ‘sacred grove, sanctuary’ > Gaul. *νεμητον* (Vaison), OIr. *nemed* ‘sanctuary’ ~ PGmc. **nemīpa-* > OS, OLFr. *nimidas* ‘sacred grove’, Sw. *Nymden*, a farm-name (Sahlgren 1953) vs. Lat. *nemus* ‘sacred grove’, Gk. *véμος* ‘wooded pasture, glade’.

5 Nicholas Zair (p.c.) points out to me that since no derivative of *ganga* in itself means ‘oath’, *ganga eið* does not in itself suggest that **Hóǵ-to-* is derived from ‘to go’, and a connection with the root of Hitt. *hā(i)-* ‘believe’ must also be considered (Puhvel 1991:10). However, this does not affect its status as a Celto-Germanicism.

6 OIr. *-drech* may also be identical to *drech* ‘vision’ < PCelt. **drikā*, derived from **d^hrġ-* ‘to see’.

7 Rasmussen’s (1987 [1999]:310) judgment that “the exact correspondence between Celtic and Germanic probably reflects an ancient borrowing in one direction or the other” is based on an isolated view of this lexeme. Contra Rasmussen’s connection with some Greek material, see Vine (2002:206ff.).

8 As she notes, Goth. *inweitan* takes the accusative while the Greek original takes the dative, i.e., chances are that this is not a Greek calque.

- (8) PCelt. **daunā* > Mlr. *dúan* ‘poem’ ~ ON *tafn* ‘sacrificial animal’ < **dap-no-* vs. Lat. *daps* ‘sacrificial meal’ < PIE **dap-* (Watkins 1976).⁹
- (9) PCelt. **uiro-k^(w)ũ-*, gen. *-kunos* ‘werewolf’ > Celtib. (Botorrita III) **uiroku**, OIr. *Ferchú*, OW *Gurci*, OBret. *Gurki* ‘(name of a) werewolf’ (McCone 1987, 2005:401) ~ Eng. *were-wolf*, Dan. *varulv*, Fr. *loup-garou* ‘id.’, where *-garou* < Franconian **war-ulf-*.
- (10) PCelt. **nerto-* > OIr. *nert* ‘strength, force’, OW, MW *nerth*, Bret. *nerzh*, Gaul. PN *Nerto-maros* ~ Gmc. **ner-pu-* > goddess *Nerthus* ‘terra mater’, ON *Njǫrðr*, father of Freyr. Derivatives from PIE **h₂ner-* ‘man; strong’ (Meid 1991:15).
- (11) PCelt. **ab-anko-* ‘water creature’ > OIr, Mlr. *abac* ‘dwarflike creature associated with water’, W *afanc* ‘beaver’ ~ PGmc. **abō(n)* ‘monkey, etc.’ (Schrijver 2004).

C. Isolated lexemes

- (12) PCelt. **uāti-* > OIr. *fáith* ‘prophet’, Gaul. οὐάτεις (pl., Strabo) and **uātu-* ‘shamanic wisdom’ > *fáith* ‘prophesy’, MW *gwawd* ‘ode’ ~ PGmc. **wōð-* > ON *óðr* ‘poetry; furious’, Goth. *wops* ‘furious’, ON *Óðinn*, OE *Wōden*, OHG *Wuotan* ‘Odin, Wotan’ (Meid 1991:25–6; Watkins 1995:118).¹⁰
- (13) PCelt. **rīmā* > OIr. *rím*, W *rhif* ‘number’ ~ PGmc. **rīma-* > OE *rím* ‘number’, ON *rím* ‘computation’, OHG *rīm* ‘account, series, number’.
- (14) PCelt. **sketlo-* > OIr. *scél* ‘tale’, W *chwedl* ‘saying, fable’ ~ PGmc. **skapla-* > ON *skáld* ‘poet’.¹¹
- (15) PCelt. **gaisto-* > OIr. *gáes* ‘cunning, shrewdness’, cf. *gáeth* ‘insanity; wind’ ~ PGmc. **gaista-* ‘(supernatural) spirit’ > OHG *geist*, OS *gēst*, OS *gāst* (Meid 1965).
- (16) PCelt. **klamo-* > OIr. *clam* ‘leprous’, W *claf* ‘diseased’ ~ PGmc. **skalmō* ‘plague, (cow’s) disease; evil spirit, crook’. Perhaps both

9 The Celto-Germanic morphology also differs from Hitt. *tappala-* ‘person responsible for court cooking’, if it in fact belongs to the same root.

10 I assume Lat. *vāēs* ‘prophet, seer’ to be a loan from Celtic.

11 It is no longer necessary to reconstruct a labiovelar for this word to account for *-w-* in Welsh; cf. Schrijver 1992 and Jørgensen forthcoming.

from PIE **skolm-eh₂* ‘disease, evil spirit’, but the Proto-Celtic vocalism is not entirely clear; syllabic **-l-* preceding **-m* would normally yield **-li-*.¹²

- (17) PCelt. **skāx-slo-* ‘demon, supernatural being’ > OIr. *scál* ‘phantom’, MW *yscawl* ‘young hero, warrior’ ~ PGmc. *skōh-sla-* > Goth. *skohsl* ‘evil spirit, demon’; both from **skōk-slo-*.
- (18) PCelt. **buko-* > Mlr. *boccánach* ‘goblin’, W *bwg* ‘ghost, hobgoblin’, *bwgan* ‘bogey, ghost’, *bwgwn* ‘fright’ ~ Fris. *bökk*, Swab. *bockelman*, NE *bogle*, *bogey*.

Category II

A. Unique morphology (and meaning)

- (19) PCelt. **kol-ino-* > Ir. *cuilenn*, W *celyn* ‘holly’ ~ PGmc. **hul-isa-* > OE *holezn*, OHG *hulis*, OFr. **huls* > Fr. *houx* ‘holly’; vs. OCS **klasŭ* ‘ear of grain’, Toch. B *klese* ‘barley meal’, Alb. *kallí* ‘straw, chaff’, Skt. *kaṭamba-* ‘arrow’, all from PIE **kel-* ‘sharp, prickly’. According to Pliny, the plant was a popular house adornment among Celtic and Germanic peoples. In Germany and Austria, holly is traditionally placed in stables to protect horses from evil spirits.¹³
- (20) **k̑uond^h-neh₂* ‘Angelica’ > Ir. *cuinneóg* ‘wild angelica, *Angelica silvestris*’ ~ PGmc. **hwannō* > ON *hvønn* ‘holy ghost, *Angelica archangelica*’ vs. **k̑uend^h-ro-* with other meanings in Lith. *švėndras* ‘reed, reed-mace’; Lat. *combrētum* ‘a kind of rush’. Angelica is an old medicinal herb and was used against evil spirits (Birkhan 1999).

B. Isolated lexemes

- (21) PCelt. **lubī* or **lubā* > OIr. *luib* ‘wort, plant’ ~ OE *lybb*, OHG *luppi* ‘magic remedy; strong plant-juice; poison; magic’, ON *lýf* ‘healing plant’, Goth. *lubja-leisei* ‘magic; poisoning’. Perhaps also

12 If Alb. *helm* ‘poison’ belongs here, the Celto-Germanic connection is less clear.

13 The holly’s connection to both horses and evil spirits may be due to the near-homonymy of PGmc. **marha-* m. ‘horse’, **marhjo-* ‘mare’, and **marō-* f. ‘female incubus’, let alone their complete homonymy in Scandinavian—cf. the ambiguous names of the holly, Dan. *maretorn*, *mareved*, *maretidsel*, *marelok*, Nw. *marekvist*, Sw. *markvist*, *marlock*, *martova*, Icel. *marhrisla*, MLG *marvlechte*, *marlock*, *mahrzopf*. Other Germanic names refer to the spirits only: Nw. *huldrelime*, NHG *Schrattelbaum*, *Hexenbesen*, Eng. dial. *witch’s besom*.

in ON *epli ellilyfs* ‘old-age medicine’ > *epli ellifu* ‘eleven apples’ (in the Eddic lay *Skírnismál*; see Polomé 1994:142–3 on the similar role of apples in Germanic and Celtic mythology).

Category III

A. Unique meaning

- (22) PIE **stér-b^heh₂* ‘stiffness’ in the specialized meaning ‘death; plague’: OIr. *us-sarb* ‘death’¹⁴ ~ OHG *sterbo*, OE *steorfa* ‘plague’ vs. Gk. στέρφος ‘animal skin, leather’, all from **ster-* ‘(be) stiff’.

B. Unique morphology

- (23) **(H)órb^h-io-* m. ‘leavings’ and **(H)órb^h-io-m* n. ‘inheritance’ > OIr. *orbae* ‘inheritance’, Gaul. *Orbio-* ‘id.’, OIr. *orb(b)e*, *orpe* ‘heir; inheritance’ ~ Goth. *arbja* ‘heir’, *arbi* ‘inheritance’, OHG *erbi*, OE *ierfe* ‘id.’ vs. **(H)orb^h-o-* ‘orphaned’ > Lat. *orbus* ‘deprived’, Gk. ὀρφανός ‘orphaned’, Arm. *orb* ‘orphan’, Skt. *árbha-* ‘small; weak; child’ (McCone 1999).
- (24) PIE **kreiH-* in **kriH-no-* > PCelt. **krīno-* > OIr. *crin* ‘enfeebled by old age, decrepit; withered’, OW *crin* ~ **kroiH-uo-m* > PGmc. **hraiwa-* n. > Goth. **hraiw* in *hraiwa-dubo* ‘turtle dove’, ON *hræ* ‘dead body’, OE *hræw* ‘id.’, OHG *hrēo* ‘dead body; grave; funeral; death’ vs. the unextended root **kerh₂-* ‘to break’ (Casaretto 2004:164).
- (25) PCelt. **uer-t-* > OIr. *fertae* (< **-iā*) ‘burial mound’, W *gwerthyr* ‘fort’, *gweryd* ‘earth, soil; grave’ ~ OE *weorð* ‘yard’, *weard* ‘guarding’, ON *varða*, *varði* ‘milestone’, *vǫrðr* ‘warden, watchman, defender; guardian spirit, house spirit, soul of the dead’.

C. Isolated lexemes

- (26) PCelt. **doueno-* > OIr. pl. *dóini*, *doíni* ‘men’, poetic sg. *doín*, *doén* ‘man’¹⁵ ~ PGmc. **dewena-* > Goth. *diwans* ‘mortal’, cf. the verb OHG *touwen*, OS *dōian* ON *deyja* ‘die’.

14 OIr. *-rb-* in *us-sarb* may be from **-ru-* instead, cf. *marb* ‘dead’ < **m̥^h-uo-s*.

15 Historically a suppletive paradigm with the sg. *duine* from PCelt. **gdonio-* ‘earthling’ corresponding to Ved. *kṣámya-* ‘earthly, mortal’, cf. Gaul. TEVO-XTONION (Vercelli) ‘of god and men’. Even if Latin *fūnus* ‘funeral procession’ is related, the item still constitutes a Celto-Germanicism in terms of semantics and word-formation (cf. Rasmussen 1989:92–3).

- (27) PCelt. **krito-* > OIr. *crith* 'trembling; fever', *crith-galar* 'illness with fever', W *cryd* 'fear' ~ PGmc. **hrīða-* > OE *hrīð* m. 'fever', Nw. *ri* 'sudden illness; short period; hard weather' (Bjorvand and Lindeman 2000:724).
- (28) PCelt. **trusko-* > OIr. *tros* 'leprous; leper', W *trwsgl* 'rude; clumsy', Bret. *trousk* 'polyps' ~ Goth. *þruts-fill*, OE *ðrúst-fell* 'leprosy'.

Category IV

A. Unique meaning

- (29) PCelt. **gaiso-* 'spear' > OIr. *gái*, Gallo-Gk. *γαῖσον*, Gallo-Lat. *gaesum*; OIr. *fo-gae*, W *gw-aew* 'javelin' ~ PGmc. **gaizo-* > OE *gār*, OHG *gēr*, ON *geirr* 'dart, spear'; from PIE **g^háisos*, cf. Gk. *χαῖος* 'shepherd's crook', Skt. *heṣas-* 'weapon'.
- (30) PCelt. **frijo-* > MW *ryd*, OIr. *rid* 'free' ~ PGmc. **frija-* > OE *frēo*, OHG *fri*, Goth. *freis* 'free' vs. Ved. *priyá-* 'dear' (Schumacher 2007:177).
- (31) PIE **kel-* 'strike' used in words for 'battle': PCelt. **kellāko-* > MIr. *cellach* 'contention, strife' ~ OE *hild* 'war, battle', OHG *hiltia*, ON *hildr* 'battle' (corresponding to the ethnonym *Celtae*).
- (32) PCelt. **trex-so-* > OIr. *tress* 'battle' and **trex-s-no-* > OIr. *trén* 'brave, strong', comp. sup. *tressa*, *tressam* ~ PGmc. **prak-ja-* > OE *prece* 'force, oppression', OS *wāpan-threki* 'ability with arms', ON *þrekr* 'strength, bravery'.
- (33) PCelt. **kagro-* 'enclosure, fort' > W *caer*, MBret. *ker*; and **kagio-* 'pen, enclosure' > MW *cae* 'fence', OBret. *caiou* pl. 'fortification, bulwark' ~ PGmc. **hagan-* 'enclosure, fence' > ON *hagi* 'pasture with a fence', OE *haga*, OHG *hac* 'hedge' and **hagjō-* > OE *hecg* 'hedge'.

B. Unique morphology

- (34) PCelt. **drungo-* > Ir. *drong* 'troop', MW *dronn* 'multitude', Gallo-Lat. (Vegetius) *drungos* 'groups of enemies' ~ PGmc. **drūhta-* > OE *dryht* 'companion', OHG *truht* 'troop', ON *drótt* 'company, following', Goth. *driugan* 'to serve as a soldier' vs. OCS *drugŭ* 'friend, other', Lith. *draũgas* 'friend'.

- (35) PCelt. **uik-* ‘fight’ > Ir. *fichim* ‘fight’, *fecht* ‘military expedition’, OW *guith* ‘battlefront’ ~ Goth. *weihan*, OE, OHG *wīhan* ‘fight’, ON *vega* ‘kill, fight’ vs. Lat. *vincō* ‘conquer’, Lith. *veikti* ‘make, work’.¹⁶
- (36) PCelt. **kauno-* ‘harbor’ > Mlr. *cúan* ~ PGmc. **haf-na-*; originally ‘enclosure, shelter (for vessels)’.
- (37) PCelt. **baduo-* ~ **boduo-* > OIr. *Badb* ‘name of the slaughter goddess’,¹⁷ Early Ir. *badb* ‘crow, demon, witch’, Nlr. *badhbh* ‘vulture; hoodie crow; fairy; scold’, Gaulish deity *Catu-bodua* ~ PGmc. **baðu-* ~ **baðwa-* > OHG *Batu-* ‘slaughter; battle’ (in names), OE *beadu* ‘battle’, ON *bǫð*, *bǫðvar* ‘war’ vs. Lat. *fodiō*, Hitt. *padda-* ~ *padd-* ‘dig (the ground), bury’, Toch. A *pāt-* ‘plough’, OCS *bodq* ‘to stab’, *bedū* ‘to stick, to dig’.
- (38) PCelt. **nītu-* > OIr. *nīth* ‘battle, distress’, Gaul. PN *Nitio-broges*, *Nitio-genna* ~ PGmc. **nīpa-* > Goth. *neip* ‘envy, enmity’, OE *nīp*, OHG *nīd* ‘battle-rage, hate, envy’, ON *níð* ‘libel’.
- (39) PCelt. **magu-* > Ogham *magu* ‘slave’, W *meu-dwy* ‘hermit (< ‘servant of God’)', MBret. *m(a)oues* ‘girl’ ~ Goth. *magus* ‘boy’, ON *mǫgr* ‘son; youth’, OE *magu* ‘child; son; man’.

C. Isolated lexemes

- (40) PCelt. **nanti-* > OIr. *néit* ‘battle, combat’, *Néit* ‘god of battle, husband of the war-goddess Nemain or Badb’ ~ PGmc. **nanþjana-* > OE *nēpan*, OHG *gi-nenden*, ON *nenna*, Goth. *ana-nanþjan* ‘to dare’.
- (41) PCelt. **poiko-* > OIr. *oech* ‘enemy’ ~ PGmc. **faiha-* ~ **faiga-* > OE *fāh*, *fāg* ‘guilty; outlawed; hostile’, NE *foe*, OHG *fēhida* ‘hate, enmity’, Goth. *fāih* ‘deceit’.

16 Brent Vine (p.c.) points out to me that while the nasal present in Lat. *vincō* appears (predictably) beside an old root aorist in perf. *vīcī*, in theory (despite *LII*² 670–1) the Celtic and Germanic presents could also be derived from the old root aorist (e.g., root aorist subjunctive → thematic present is well-attested). In that case, the Germanic and Celtic material might be closely related, morphologically, to the old aorist (as in Latin), and since the Latin semantics are quite similar to the one shared by Celtic and Germanic, only the development into a thematic present would then point to a Celto-Germanicism.

17 Remarkably, *Badb* is the sister of *Macha*, married to *Nemed*, and of *Mor-rígain*; of these four names, the first three are all Celto-Germanicisms, while cognates of *Mor-* are also found in Slavic.

- (42) PCelt. **slak-* 'strike' > Mlr. *slactha* 'struck (ptc.)', *slacc* 'sword', Gael. *slachdaim* 'strikes with a hammer' ~ PGmc. **slahana-* > Goth., OHG *slahan*, ON *slá*, OE *slēan* 'slay'.
- (43) W *llost*, Bret. *lost* 'spear', Ir. *loss* 'end, tail' ~ ON *ljóstr* 'fish-spear', Dan. *lyster* 'eel-spear', *ljósta* 'strike'.
- (44) PCelt. **mūg-* 'conceal' > OIr. *for-múigthe*, *for-múichthai* 'smothered, concealed' ~ PGmc. **mūk-* > OHG *mūhhen* 'lie in ambush for', NHG *Meuchler* 'assassin', ME *micher* 'thief', Eng. dial. *mitch* 'hide (oneself)'.
- (45) OIr. *bágaid* 'fight, boast', *bág* 'battle', W *beio* 'blame', Gaul. *Bagaudae*, probably 'the fighters', name of Gallic peasants who rebelled under Diocletian ~ PGmc. **bēg-* > OHG *bāgēn* 'quarrel, fight', ON *bægjast* 'quarrel, strive'.¹⁸
- (46) PCelt. **gwelti-* 'madman, lunatic' > Mlr. *geilt* 'panic-stricken fugitive from battle', W *gwyllt* 'wild, savage, mad' ~ Goth. *wilpeis*, OE *wilde*, OHG *wildī*, ON *vildr* 'wild'.
- (47) PCelt. **ueidu-* 'wild' > OIr. *fiad* 'wild animals', *fian* 'troop of young warriors', MW *gwydd* 'wild', *gwyddel* 'a Gael, Irishman' ~ PGmc. **wajōaz* > OE *wād* 'hunt'.
- (48) PCelt. **boudi-* 'victory' > OIr. *búaid* 'victory', W *buddig* 'victorious' ~ ON *býta* 'exchange, divide', MLG *būte* 'booty',¹⁹ all from **bʰóydʰi-*.
- (49) PCelt. **fleid-o-* 'succeed' > W *llwyddaf* ~ PGmc. **flītana-* > OE *flītan*, OHG *flīzan* 'attempt, try hard'.
- (50) PCelt. **geistlo-* 'hostage' > Ir. *giall*, W *gwystyl* 'hostage', Bret. *gouestl* 'vow; promise', Gaul. PN *Con-geisthus* ~ PGmc. **gīslo-* > OHG *gīsal*, NHG *Geisel*, OE *gīsel*, ON *gisl* 'hostage'.
- (51) PCelt. **dūno-* 'fortification, rampart' > Ir. *dún*, W *din*, Gaul. *-dūnum* in place-names ~ ON and OE *tún* 'hedged or fenced lot, enclosure'; OHG *zūn* 'enclosure, hedge'.²⁰

18 Even if Latv. *buōzties* 'be annoyed' belongs here (LII² 68. s.v. **bʰeh₁ǵʰ-*), Celtic and Germanic still share a common semantics.

19 NE *booty* is a borrowing from Scandinavian.

20 Even if these words are derived from a PIE root **dʰeuh₂-* 'be finished, come full circle' (Watkins 1991:453), the derivative and its meaning are specific to Celtic and Germanic.

- (52) Ir. *cliab* ‘*shield (of wicker-work)’ > ‘basket; wicker frame of a boat; chest’ ~ ON *hlif* ‘shield, protection’, OHG *līpen, līppen* ‘protect’, Goth. *hleibjan* ‘take the part of’.
- (53) Nlr. *tailm*, Bret. *talm* ‘sling’, W *telm* ‘snare, trap’ ~ ON *þjálmi* ‘sort of snare’. The ON consonantism seems to indicate common heritage.

Category V

A. Unique meaning

- (54) PCelt. **brus-na-* > OIr. *bronnaim* ‘injure, damage’, **brus-o-* > W *briw*, Corn. *brew* ‘wound’ ~ PGmc. **brūs-* > OE *brysan* ‘bruise’, OHG *brōsma* ‘crumb’ vs. Lat. *frustum* ‘fragment’.
- (55) PCelt. **kaiko-* ‘having an eye defect’ > OIr. *cáech*, OCor. *cuic* ‘one-eyed’, W *coeg-ddall* ‘half-blind’ ~ Goth. *háih* ‘one-eyed’; vs. Lat. *caecus* ‘blind’. The Celtic god Lug closes one eye in his magic ritual, while in Germanic mythology Odin is one-eyed (Polomé 1994:145).
- (56) PCelt. **knidā-* > OIr. *cned* ‘a wound’ ~ PGmc. **hnītana-* > ON *hníta* ‘wound to death’, OE, OS *hnītan* ‘thrust, stab’; vs. Gk. *κνίζω* ‘to scratch’.

B. Unique morphology

- (57) PCelt. **aglo-* ‘wound, affliction’ > OIr. *áil* ‘insult’, Mlr. **álad* ‘wound’, MW *aeled* ‘pain; grief’ ~ PGmc. **agla-* > OE *egle* ‘disagreeable, loathsome’, Goth. *agls* ‘shameful’, *aglīpa*, *aglo* ‘affliction’ vs. Av. *aγa-* ‘bad, evil’, Skt. *aghá-* ‘bad’, *aghrā-* ‘evil, distress’, *aghalá-* ‘terrible’, all from PIE **ag^h-* or possibly **h₂eg^h-*.
- (58) PCelt. **g^{wh}en-i-* ‘wound’ > OIr. *guin* ‘wound, injury’ ~ PGmc. **banjō-* > Goth. *banja* ‘strike, wound’, ON *ben*, OE *ben(n)* ‘id.’, OS *beni-wunda* ‘wound’ vs. PGmc. **ban-an-* ‘murder’ in OE *bana*, Da. *bane-sår* ‘deadly wound’ < **g^{wh}en-* ‘to kill’.
- (59) PCelt. **koldo-* > OIr. *coll* ‘destruction’, W *ar-choll* ‘wound’ ~ PGmc. **halta-* > Goth. *halts*, OE *healt* ‘lame’.
- (60) PCelt. **krenx-tu-* > OIr. *crécht* ‘wound’, W *creithen* ‘scar’, Bret. *creizenn* ‘id.’ ~ PGmc. **skranh-a-* > ON *skrá* ‘scroll’.

C. Isolated lexemes

- (61) OIr. *gonaid* ‘wounds; slays’, W *gwanu* ‘pierce, thrust, stab’, *ymwan* ‘joust, tilt’, *ymwanwr* ‘combatant’ ~ PGmc. **wunda-* > Goth. *wunds*, OE *wund*, OHG *wunda*, ON *und* ‘wound’.
- (62) PCelt. **snad-o-* > Mlr. *snaidid* ‘to cut; to scratch’, W *neddyf* ‘axe’ ~ OHG *snatta* ‘wound; scar; bruise’, ON *snata* ‘spear’.
- (63) PCelt. **saitro-* > OIr. *saethar* ‘work, labour’ and **saitu-* > OIr. *saeth* ‘trouble’, MW *hoed* ‘pain’ ~ PGmc. **sai-ra-* > OE *sārig* ‘sorry’, OHG *serō* ‘painfully; in a difficult way’, ON *sárr* ‘painful’, *sár* ‘wound’.²¹

Category VI

A. Unique meaning

- (64) PIE **kād-* in derivatives with the meaning ‘hatred’: PCelt. **kad-si-*, **kādo-* > Mlr. *caiss*, W *cawdd*, Bret. *cas* ‘hatred’ ~ PGmc. **hatiz-* > Goth. *hatis*, OE *hete*, OHG *haz* ‘hatred’, ON *hatr* ‘hatred; persecution’ vs. Av. *sādra-*, Gk. *κῆδος* ‘sorrow; pain; misery’, Osc. gen.sg. *cadeis* ‘hostility’ (cf. also Birkhan 1967, Rübekeil 2001).

B. Unique morphology

- (65) A secondary thematic derivative **h₂up-él-o-* ‘evil’ > OIr. *fél* ‘evil’ ~ PGmc. **ubila-* ‘evil’ > Goth. *ubils*, OE *yfel*, OHG *ubil* vs. Hitt. *ḫuwapzi* ‘ill-treats, despoils’, Toch. A *umpar* ‘bad’, all from PIE **h₂up-* ‘treat badly’ (cf. Hyllested and Cohen 2007:16).
- (66) PCelt. **kloino-* > OIr. *cloen* ‘crooked; unfair; evil’ ~ PGmc. **hlaina-* ‘hill’ > Goth. *hlain* ‘hill’, Nw. dial. *hlein* ‘steep slope’, both with **-no-* from PIE **klej(H)-* ‘to lean’, cf. Ved. *śráyati*, Lith. *šliėti* ‘id.’, *šlainùs* ‘slanting’.

C. Isolated lexemes

- (67) PCelt. **loktu* > OIr. *locht* ‘fault, blame; mistake’ ~ PGmc. **lahana-* > OE *lēan*, OHG *lahan*, ON *lá* ‘to blame’.

21 Even if Lat. *saevus* ‘wild, ferocious’ and Hitt. *šāi-* ‘be sullen, angry’ are related (see on the latter Kloekhorst 2008:692–3), the Celtic and Germanic items form a semantic entity.

Category VII

A. Unique meaning

- (68) PCelt. **reid-o-* ‘ride; riding; chariot’ > Gaul. *rēda* ‘travelling-carriage with four wheels’, OIr. *riadaim* ‘ride (in vehicle)’, Ir. *dé-riad* ‘team of two horses’, W *rhwyddau* ‘facilitate, speed’ ~ ON *ríða*, OE *rīdan*, OHG *rītan* ‘to ride’; ON *reið* ‘riding; horse-riding band; wagon’ vs. Latv. *raidīt* ‘send quickly; hunt’.

B. Unique morphology

- (69) Compounds with **h₁ek₂yo-* ‘horse’ and **reid^h-*: Gaul. PN *Epo-rēdo-rīx* ~ OE *eo-red*, OS *eo-rid-folc* ‘cavalry’, ON PN *Jó-reiðr*.
- (70) *i*-stem adjectives meaning ‘easy’, ‘ready’ derived from **reid^h-* via ‘driving’ or ‘ready to go’: PCelt. **rēdi-* > OIr. *réid* ‘simple, easy, flat’, W *rhudd*, OBret. *ruet* ‘easy, quick’ ~ OHG *bi-reiti* ‘ready’, NE *ready*.
- (71) PCelt. **axsilā* > W *echel*, MBret. *ahel* ‘axis’ ~ PGmc. **ahsulaz* > ON *qxull* ‘axis’ vs. formations without **-lo-* in Lat. *axis*, Lith. *ašis* ‘id.’.
- (72) PCelt. **uegno-* > OIr. *fén*, W *gwain*, Gaul. *co-vinnus* ‘wagon’ ~ PGmc. **wagna-* > ON *vagn*, OHG *wagan* ‘wagon’ vs. other formations in Skt. *vāhana-*, Lat. *vehiculum* ‘id.’.
- (73) PIE **sent-* ‘to travel’ in nominal formations meaning ‘road; retinue’; PCelt. **sentu-* ‘path’ > OIr. *sét*, MW *hynt* ‘path’, *epynt* ‘horseroad’ ~ PGmc. **sinþa-* and **gasinþja-* ‘retinue’ > OHG *Gi-sindi* ‘war retinue’.

C. Isolated lexemes

- (74) PCelt. **marko-* ‘horse’ > Mlr. *marc*, W *march*, Bret. *marc’h*, Gaul. (acc.sg.) *μάρκαν* ‘horse’, *Marco-* in place-names ~ OHG *mar(a)h*, OE *mea^h*, ON *marr* ‘id.’.
- (75) PCelt. **drux-to-* > Mlr. *drochta* ‘tub, vessel’ ~ PGmc. **trugaz* > OE, ON *trog*, OHG *troc* ‘trough’.
- (76) PCelt. **kanx-s-ikā-* > W *caseg*, Bret. *kazeg* ‘mare’, not formally identical to PGmc. **hangista-* ~ **hanhista-* ‘horse, stallion, etc.’ (Jørgensen 2006), but their similarity can hardly be coincidental in

the light of other equestrian commonalities; cf. also that PCelt. **keng-o-* ‘to tread, step, walk’ is irregular in the first place.

- (77) PCelt. **mongo-* ‘mane’ > Mlr. *mong*, W *mwng* ‘id.’ ~ ON *makki* ‘upper part of a horse’s neck’, Dan. *manke* ‘mane’; cf. also ON *mōn*, OE *manu* ‘mane’.
- (78) PCelt. **doklo-* > OIr. *dúal* ‘strand, lock (of hair)’ ~ PGmc. **tagla-* > ON *tagl*, Dan. *tavl* ‘hair of a horse’s tail’, OE *tægl* ‘tail’, Goth. *tagl* ‘a hair’.

Category VIII

A. Unique meaning

- (79) PCelt. **rādī-* > OIr. *rádim* ‘to say, to speak’, MW *ad-raud* ‘to tell’ ~ PGmc. **rōdiana-* > Goth. *rodjan*, ON *róða* ‘to speak’.

B. Unique morphology

- (80) PCelt. **bana-tlo-* > W *banadl*, MBret. *balazn*, *banazl* ‘broom’ ~ OE *bōnian* ‘polish’, OS *bōnēn* ‘scrub, polish’, both from < **b^heh₂-n-* ~ **b^hō₂n-* vs. Gk. φαίνω ‘shine’, Arm. *banam* ‘open, reveal’ (Olson 1988:26).
- (81) PCelt. **gablo-*, **gablā-* > OIr. *gabul*, Nlr. *gabhal*, W *gafl* ‘fork’ ~ PGmc. **gabalō-* > OHG *gabala*, OE *geafol* ‘id.’.
- (82) PCelt. **φlāro-* ‘floor’ > OIr. *lár* ‘ground, surface; middle’, W *llawr* ‘floor’, Bret. *leur* ‘id.’ ~ PGmc. **flōruz* > OIr. *flórr* ‘floor of a cow stall’, OE *flōr* vs. Lat. *plānus* ‘flat’.
- (83) PCelt. **sītā-* > Mlr. *sithlad* ‘sieving’, W *hidl*, MBret. *sizl* ‘sieve’ ~ PGmc. **sēpla-* > ON *sáld* ‘sieve’, Fi. (< Gmc.) *siekla*, *seula* ‘id.’ all from **seh_{ij}-tlo-*, **sih_{ij}-tlo-* vs. **seh_{ij}-to-*, **sih_{ij}-to* in Lith. *sėtas*, CS *sito*.
- (84) PCelt. **φatimā-*, **φatamī-* > Gael. *aitheamh*, W *edafedd* ‘yarn; thread’ ~ PGmc. **fapmaz* > OHG *fadum*, OE *fæðm*, ON *faðmr* ‘spread arms, embrace; thread’ (Hamp 2008).²²
- (85) PCelt. **iexti-* > Ir. *icht* ‘tribe’, W *ieith* ‘language; nation’, MBret. *yez* ‘language’ ~ PGmc. **jehti-* > OHG *jiht* ‘utterance’ (cf. *jehan* ‘to speak’) vs. Lith. *juōkas*, Lat. *iocus* ‘jest’.

22 Hamp includes Alb. *pê*, pl. *penj* ‘thread’, but Celtic and Germanic still agree both on *o*-grade and semantics.

- (86) PCelt. **rextus* > OIr. *recht* 'law, justice', MW *kyf-reith* 'id.' ~ PGmc. **rehtuz* > ON *rétr* 'justice, law' < **h₃reġ-tu-* with a shared, unpredictable meaning (Schumacher 2007:177).
- (87) PCelt. **roino-* > OIr. *roen* 'road; mountain range'; Bret. *run* 'hill' ~ PGmc. **raina-* > ON *-rein* 'strip of land' (in compounds), OHG *rein* 'ridge of earth as boundary mark'.

C. Isolated lexemes

- (88) **suek-* > W *chweg*, Bret. *c'houek* 'sweet, pleasant (of taste)', W *chwaeth* 'taste' ~ OE *swecc*, *swæcc* 'taste, (pleasant) smell', OHG *swehhan* 'to smell (bad)'.
- (89) **sueg-* 'to bend' in PCelt. **swengo-* 'slender' > Mlr. *seng*, Gaul. PN *Singi-dūmum* ~ OE *swancor*, MHG, MLG *swanc* 'slender', Dan. *svang* 'arch of foot' vs. **sueg-* and **suenk-* in other formations and languages (IEW 1047).
- (90) **sue-* > OIr. *to-seinn* 'hunts; follows' ~ OHG, OE *swimman*, ON *svim(m)a* 'to swim', Goth. *swum(f)sl* 'lake' < **swum-sla-* (Bjorvand and Lindeman 2000:893–5, but they reject the connection; Casaretto 2004:408).
- (91) PCelt. **grando-*, **grendo-* 'beard' > Mlr. *grend*; MW *grann* 'beard; chin; cheek', Provençal *gren* 'moustache' (< Gaul.) ~ PGmc. **granō-* f. > OE *granu* 'moustache', OHG *grana* 'hair of the beard', ON *grøn*, Goth. *grano* 'hair of the beard; spruce (needle)'.
- (92) PCelt. **lind-o/u-* 'drinkable water' (cf. Matasović 2009:240) > OIr. *lind* 'liquid', W *llyn* (m./f.) 'drink', (m.) 'lake' ~ Icel. *lind* 'spring, fountain', MHG *lünde* 'wave'.
- (93) PCelt. **glāuo-* > MW *glo* 'charcoal' and PCelt. **goulo-* (dissimilated from **glou-lo-*?) > Mlr. *gúal*²³ ~ PGmc. **kula-*, **kulan-* 'charcoal' > ON *kol* (pl.), OE *col*, OHG *kolo*.
- (94) PCelt. **druxtu-* (< **drup-tu-*) > OIr. *drúcht* 'dew, a drop' ~ PGmc. **drupa-* > ON *dropi*, OE *dropa*, OHG *tropfo* 'drop'.
- (95) PCelt. **kaito-* 'wood' > OW *coit*, OCorn. *cuit*, MBret. *coat* 'forest, wood', Gaul. PN *Καυτόβριξ*, *Cēto-briga*, *Eto-cētum* ~ PGmc.

23 Even if PCelt. **goulo-* and the Germanic forms are related to Skt. *jvālati* 'burns' and Toch. B *śoliye* 'hearth', Celtic and Germanic still share a specialized meaning.

**haiþja-* > Goth. *haiþi* ‘field, heath’, NHG *Heis-ter* ‘small tree or bush’, ON *heiðr* ‘heath, moor’.

- (96) **gan(dʰ)-no-* in Mlr. *gann* ‘vessel, jug, pitcher’ ~ PGmc. **kannō* f. > ON *kanna*, OE *canne*, OHG *channa* ‘can, jug’.

4. Revision of semantic areas and their implications

Our revised list may be said to fall into the following categories:

- (1)–(18): cosmology, spirits, supernatural creatures
- (19)–(21): medicinal herbs or plants connected to popular beliefs
- (22)–(28): sickness and death
- (29)–(53): battle and warfare, fortifications, weaponry
- (54)–(63): words for ‘wound’, ‘damage’
- (64)–(67): hostility
- (68)–(78): equestrian terminology
- (79)–(96): words belonging to other parts of the vocabulary

Or, in a boiled-down version (excluding (79)–(96)):

- (a) religion and healing ((1)–(28))
- (b) warfare and equestrian terminology ((29)–(78))

Quite a few of the lexemes in question can be placed in either category. Remarkably, as many as nine words for ‘wound’ turn out to be Celto-Germanicisms in one way or another.

Only one-fifth of the lexemes fall outside the two main categories, and, with a couple of exceptions, even these are typical culture-words. Such a distribution militates against the possibility of a Celto-Germanic genetic subgroup (pace Mansion 1912) and, obviously, the existence of Italo-Celtic need not be refuted on this basis. Note also that the list of Northwest IE innovations compiled by Oettinger (2003) contains not a single Celto-Germanicism. Instead, the situation presented here seems to reflect contacts between speakers of the IE dialects that later evolved into Proto-Celtic and Proto-Germanic. Religion and warfare seem to have been of particular concern.

Linking reconstructed prehistoric languages to archaeological findings is always risky business, but we may tentatively fix this cultural unity in time and space in Eastern Central Europe around 2000 BCE, when the pre-Celtic Únětice culture in the present-day Czech Republic bordered late, possibly pre-Germanic,

varieties of the Corded Ware culture.²⁴ This scenario is at least partly compatible with conclusions reached by Kristiansen and Larsson 2005 and Kristiansen 2009: they envisage contacts between Pre-Germanic peoples and Pre-Celts immigrating from the South, spreading out over Western Europe 2500–2000 BCE, not least by means of warfare and horses, until more hierarchical societies arise in the second millennium BCE.

5. A Fennic connection?

Most of the items in question look old and probably represent regional IE innovations, while others may have been taken over from the same third source. Interestingly, some of them seem to be shared with Balto-Fennic languages, suggesting a larger cultural continuum stretching further to the north. Particularly intriguing are Fi. *hepo*, *hevonon*, Est. *hobune* ‘horse’, Fi. *ratsu* ‘riding-horse’ and *kavio* ‘hoof’ (dial. *kapja*) since they all look Indo-European, but at the same time do not show the regular sound substitutions displayed by any attested Indo-European branch. Fi. *luppo* ‘lichen’ is inherited from Proto-Uralic, so if it is connected to item (21), it must have been borrowed from Fennic into Celtic and Germanic.

If Balto-Fennic belongs to this cultural continuum, the question arises whether lexical exchange has taken place directly between Late Proto-Fennic and Pre-Proto-Celtic, or whether Pre-Proto-Germanic was always the provider: PCelt. **sanesto-* ‘secret advice’ (Matasović 2009:322) is suspiciously reminiscent of Fi. *sanasto* ‘list of words’ (synchronically analyzable as *sana* ‘word’ + collective *-sto*). Compare the semantics of PCelt. **rūno-* and PGmc. **rūna-* (item (4) above), which in itself must be identical to Fi. *runo* ‘song, poem’. The vowel in *runo* is unexpectedly short, i.e., it does not behave as loanwords from Proto-Germanic normally do and may have been borrowed at an earlier stage. Nlr. *lón*, pl. *lóinte* (> NE *lunch*) could represent Late Proto-Fennic **louna* ‘southwest; noon; lunch’ (Fi. *lounas*), which is derived from Proto-Uralic **luwe* ‘south’. Note that this word is already known to have been borrowed into Baltic (Latv. *launags* ‘lunch’, Lith. *launagas* ‘dinner’). Fi. *maa* ‘land’ and its Balto-Fennic cognates go back to Proto-Uralic **māye*, reminiscent both in form and semantics of PCelt. **magos* ‘plain, open field’ > Olr. *mag* ‘plain’, W *ma* ‘place’, Gaul. PN (*Arganto-*)*magus* (cf. Schrijver 2001:423). Fi. *tuoni* ‘dead’ < Late Proto-Fennic **tōne* could formally reflect Proto-Celtic **doueno-* (item (26)). Fi. *kalma* ‘grave;

24 Ünēice bodies are typically buried with jugs—meaning that **gan(d^h)- too* (item (96)) could justifiably be categorized as belonging to the religious vocabulary.

disease, Death-goddess, guardian of the abode of the dead' could belong with PCelt. **klamo-* 'grave' (item (16)).

For the same concept, PGmc. **haljō-* f. can be reconstructed (cf., e.g., ON *Hel* 'death goddess'). It is most often seen as reflecting PIE **k̑ol-ieh₂*, derived from **k̑el-* 'to cover, conceal'. However, if Fi. *Koljo* 'name of a giant' is a Germanic loan (*IEW* 553–4), the Finnish vocalism constitutes a problem—why is PGmc. **-a-* replaced with *-o-*? Moreover, a Proto-Finno-Ugric form **kolja* can be reconstructed also on the basis of Komi *kul'* 'water spirit' and Mansi (Pelym dial.) *kul'-nājər* 'master of the netherworld, devil'. This word is internally analyzable as a participial form or agent noun derivative consisting of the Proto-Uralic verbal root **kole-* 'to die' and the agent-marker *-ja* with root-final *-e* regularly being dropped when a suffix is added.²⁵ Formally, nothing speaks against this word being a borrowing in the reverse direction, from Proto-Fennic into Pre-Proto-Germanic, i.e., at a stage before the Germanic sound shift and the development of **o > *a*.

Conclusions

An analysis of the Northwest Indo-European lexical material shared only by Celtic and Germanic is suggestive of the following scenario: the precursors of Celtic and Germanic evolved from different Indo-European dialect groups. Shortly after their migrations into Europe they came to form part of a cultural community, possibly influenced by indigenous populations or migrators from elsewhere. This had a significant impact on specific parts of the vocabulary, notably terms for religion and warfare. New derivatives were formed on the basis of Indo-European material, while some of the old ones were preserved in this area only. Some shared loanwords can be traced back to Late Proto-Fennic, spoken in their northern vicinity. There are even indications that Late Proto-Fennic may have been in direct contact with Pre-Proto-Celtic, not always with Pre-Proto-Germanic as the provider. Celtic and Germanic peoples continued to influence each other, linguistically and in other respects, as they gradually developed the characteristics by which we define them.

25 For a slightly different analysis of the Uralic word see Katz 2003:183.
